BLUE BATON

Finally . . .
a *Collapsible Training Baton* for
regular and reality based training!

Setcan™

BLUE BATON: A REVOLUTION IN LAW ENFORCEMENT, MILITARY, AND CORRECTIONS TRAINING!

Blue Baton Advantages:

Developed by Police Officer and DT Trainer Clive Milligan, the patent pending Blue Baton features:

- 21" collapsible training baton with foam grip
- Fits into most common holsters/scabbards whether open or closed
- Made from a lightweight high-impact-resistant nylon
- Most realistic training baton on the market today

- Same training techniques as real expandable batons
- Additional mushroom-shaped (Hindi) end cap included
- Striking section of the baton is made from flexible synthetic rubber
- Full 1 year warranty

The Blue Baton allows the officer to select the baton and actually employ the same motor skills and negative time framing (accessing, drawing, extending, and striking) that an officer would in the field. It also builds effective "mind maps" from repetition of proper technique.

"I've been teaching in the Reality Based Training realm for most of my adult life, and every now and then a new technology emerges that fills a void that helps us train more realistically . . . If your officers utilize collapsible batons in an operational setting, these training batons are a "must have" . . . It is a training baton that functions identically to a conventional collapsible baton with the exception that the striking part (last shaft/striking tip) is made from a flexible synthetic rubber but still requires protective padding for role players. It is sufficiently rigid that it stings on unprotected body parts, but will not injure the way a conventional baton will. I heartily endorse this product!"

Kenneth Murray - Co-Founder of *SIMUNITION®* and author of the book "*Training at the Speed of Life - The Definitive Textbook for Police and Military Reality Based Training*"

The following agencies have taken their RBT and regular baton training to a whole new level with the **Blue Baton**:
